LAKE FORK BOAT LANES

Humminbird Directions:

To transfer the information from your new Lake Fork BOATLANES MMC card to your Humminbird GPS Unit: **Begin by inserting the card into your Humminbird Unit.**

Your Humminbird GPS Unit makes it very easy to access the BOATLANES Lake Fork Waypoints. Once you insert the BOATLANES MMC card into your GPS; Wait for it to load (*a few seconds*) and the waypoints should appear clearly marked on your GPS screen.

“Unlocking a Pointer” is the most efficient way to navigate using your GPS because it allows you to point your boat in the direction of the next GPS waypoint and gives you visual reference of your direction.

In order to utilize **COURSE PROJECTION LINE** (“Unlock a Pointer”): **1)** Highlight “Course Projection Line” on the Navigation main menu **2)** Use the LEFT or RIGHT 4-WAY Cursor Control keys to change the Course Projection Line setting (Hidden, Visible, Default = Visible).

For best navigation: Use 500FT. or 1,000FT. ZOOM on your GPS Unit screen.

NOTE: The *Silver Colored* waypoints are traveled often by fishing guides, but are not officially marked with buoys on the water—**THEY ARE NOT CLEAR BOAT LANES**. You should only navigate using these waypoints with **EXTREME CAUTION** and do so **AT YOUR OWN RISK!**

For questions regarding your new Lake Fork Boatlanes MMC card please call (903) 312-0608 or (903) 312-0609 or Email: landlvick@gmail.com.

Thank you for your business!
